Retrofitting towards climate neutrality

D7.4 Second revision of Data Management Plan (DMP)

Programme: HORIZON EUROPE

Grant agreement number: 101096522

Project acronym: Green Marine

Project title: Retrofitting towards climate neutrality

Prepared by: CMMI

Date: 30/07/2024

Report version: v2.0

D7.4 Second revision of Data Management Plan (DMP)   **Green Marine**

EXECUTIVE SUMMARY

This document is deliverable "D7.4 – Second revision of Data Management Plan (DMP)" of the European Union project "Retrofitting towards climate neutrality" (herein referred to as "**Green Marine**"), with **grant agreement No. 101096522**.

The **Green Marine** Second revision of the Data Management Plan (DMP) reiterates the specific section in the deliverable "D7.3 Initial Data Management Plan (DMP)". Note that CMMI, UPM, SINTEF, and UoS have confirmed no changes as reported in the Initial Data Management Plan (DMP). SMP/WPS, BX, CalMac, and PDM suggested some adjustments (i.e., inclusion/ removal of data sets), thus a table was added in the report to monitor such modifications. Also, note that the draft DMP was included in section 6 of the D7.2 Project Handbook including draft Data Management Plan.

This deliverable mainly targets the consortium partners as this revised data management plan defines the purpose and scope of the DMP, the FAIR data principles (findability, accessibility, interoperability and reuse), the research outputs, allocation of resources, data security and ethics. In addition, all partners have provided information about their organisation's dataset generation on a per-task basis and data handling procedures. It serves as a reference document for all **Green Marine** team members including potentially any individuals joining in the project at a later stage. It follows up D7.3 – "Initial Data Management Plan (DMP)".

This data management plan is understood to be a living document and is updated if the need arises during the implementation of the project to improve the internal **Green Marine** processes and management. Any changes will be reflected in D7.5 – "Third revision of Data Management Plan (DMP)" due on month 36.
