EXECUTIVE SUMMARY

This document is deliverable “D7.5 – Third revision of Data Management Plan (DMP)” of the European Union project “Retrofitting towards climate neutrality” (herein referred to as “**Green Marine**”), with **grant agreement No. 101096522**.

The **Green Marine** third revision of the Data Management Plan (DMP) reiterates the specific section in the deliverable “D7.4 Initial Data Management Plan (DMP)”. No changes have been provided by CMMI, CCM, SINTEF, SMP/WPS, CalMac, PDM and UoS compared to the Initial Data Management Plan (DMP). BX and UPM suggested some adjustments (i.e., inclusion/removal of datasets).

The revised Data Management Plan (DMP) defines its purpose and scope, outlines the application of the FAIR data principles (findability, accessibility, interoperability, and reusability), and describes the research outputs, resource allocation, and data security and ethical considerations. Furthermore, all partners have provided task-specific information on dataset generation and data handling procedures within their respective organisations.

The document serves as a reference for all Green Marine project members, including those joining the project at a later stage, and follows up on D7.4, “Second revision of the Data Management Plan (DMP)”.

The DMP is a living document and may be updated throughout the project implementation to support continuous improvement of Green Marine internal processes and management. Any updates will be documented in D7.6, “Fourth revision of the Data Management Plan (DMP)”, due in month 48.
